Intern at **TechnoHacks EduTech Official**

Aug 2024 – Sep 2024

PROJECTS

Campus Connect – [Github](#) [Live Preview](#)

- Built a full-stack real-time campus community application enabling students to post updates, interact, and share information within their verified college network.
- Deployed and tested the application end-to-end to ensure smooth performance and a modern social-media-like experience.
- Built scalable Node.js + Express backend with modular APIs, middleware, and optimized request handling.

Chatify- [Github](#) [Live Preview](#)

- Developed a chat platform supporting image sharing.
- Implemented real-time messaging using Socket.io.

AI Code Reviewer- [Github](#) [Live Preview](#)

- Built an AI-based tool for reviewing code using Google Gemini API.
-

CERTIFICATION

- HP LIFE AI for Beginners
- Tata Crucible Campus Quiz
